INTERLOCKING SAND-SET PAVERS
FOR PEDESTRIAN APPLICATIONS

ARTISTIC PAVER MFG.®

STEPLOCK®

Why settle for the usual when you can have Artistic Pavers?

We won't crack you up, but we do make good pavers...

Regular poured concrete decks crack, Artistic Pavers flex between pavers avoiding cracks.

We are cool...

Cool on your feet. Most of our pavers are light colored and typically much cooler than most other deck surfaces.

Smooth, but not too smooth...

Our pavers are comfortable to walk on, but not too slippery, dry or wet.

Some exercising is fun, but exercising to clean your deck isn't...

That's why we manufacture our pavers to require very little maintenance. Because of additives and the high density of our pavers, algae, mildew and other yucky stuff have a difficult time growing on our product. Many natural and man made products require sealing to avoid the yucky stuff, we don't.

Salt pools, no problem...

Again, because our pavers are so dense, salt water from pools that use chlorinators will not damage our decking.

Save your precious toes...

Our pavers are designed for commercial and residential pedestrian traffic. Calibrating and beveling the border of our pavers keeps you from stubbing those precious little toes.

Lickety-split...

While you're sleeping, we're probably making pavers. Our standard pavers are usually ready for speedy delivery. Installation is quicker than installing a concrete slab with a topping, because our pavers don't require a slab and paver installations are less affected by bad weather.

It is great to be special...

We make many different types of coping. Bullnosed on one, two, three or all four sides of the paver. By using our coping, you are able to have a spa or raised wall without having a seam going through the middle of the coping.

Great in cold weather...

Our product passed the rigorous 50 cycle freeze-thaw test with no measurable weight loss or cracking.

We hate to call ourselves cheap, but we are very fairly priced ...

Our pavers and coping add so much to the look of your backyard environment, are so functional, and will last so long, that you would think we cost a bunch. We don't, we are less costly than many materials that require slabs and a little more than some, but well worth it.

The Details

Artistic Paver Mfg.[®] offers many options of coping and specialty pieces to provide a rich looking and durable solution.

Artistic Paver's coping and specialty pieces are ideal for architectural and decorative accents such as:

- Pool coping
- Raised walls
- Steps
- Spillways
- Fountains
- Benches
- Planters
- Remodeling Projects

This ensures that materials used for architectural solutions will coordinate with the Artistic Paver decking material. They will not only give your project a great look, but they also make installation easy, saving you time and money.

The result is a luxurious combination of beauty and technology that will keep you satisfied for many years to come.

Your driveway deserves the same quality as your deck...

Our pavers are manufactured with natural materials and will vary in color. The variation in color and shade can enhance the natural look and beauty of the finished project.

ROADLOCK®

ARTISTIC PAVER MFG.®

Designed for Vehicular Applications

Make a "Welcome to My Home" statement by choosing the same Artistic Pavers quality for your driveway.

Roadlock® driveway pavers have a stunning look and are a refreshing change to the old concrete driveways. Its polished and smooth surface adds beauty to any project.

Our high-quality driveway pavers will redefine your concept on how to keep your driveway looking its best. Built with the latest technology, they are durable and require very little maintenance.

Choose from a classic pattern or create your own. Mix and match colors to express your style and preferences. The end result will be an elegant entrance, while also enhancing the value of your property.

The 8x24 Planklock is a 2-3/8" thick plank with spacers designed especially for pedestrian applications.

To use the 2-3/8" thick 8x24 Planklock with any 1-5/8" thick coping pieces the deck base needs to be adjusted to match the coping thickness.

DISCLOSURES

- Because of color dye and natural raw materials inconsistencies, products will have color shade and texture variations.
- In Shellock pavers, natural shells are embedded at different distances from the surface of the material, and then polished. Therefore, a small percentage of the shells are expected to come loose from the surface and edges of the tile. This occurrence will diminish over a short span of time and in no way will affect the strength of the product.
- Please expect variations in colors and some chipping and non-perfect edges. These details are intended to enhance the appearance of our pavers.
- Due to the process required to manufacture, package, deliver, unpack, install and compact, small chipping can be expected.
- Pavers are calibrated to achieve a uniform thickness and are manufactured in metric sizes and are rounded to the closest equivalent size in inches. Coping will be slightly smaller than nominal dimensions due to the processes required to manufacture them. Please refer to the actual sizes listed above in millimeters for accuracy. The dimension marked

with (B) is the bullnose side.

(*) The 4x8 border pavers are machine cut and not dimensionally consistent. Artistic Paver Mfg. recommends these pavers should be used strictly as border material, therefore, not recommended for field material.

- Pavers should be installed from several pallets at a time to maintain the best color consistency.

- Due to the diversity in the natural aggregates used to make our pavers, the difference in aggregates in each plant and other elements beyond our control, the colors seen on printed material or published on our website may not exactly match the exact color of the paver. Before you make your decision, we recommend verifying your selection at your local Artistic Paver retailer.
